BASE PREPARATION,
CONSTRUCTION OF
NEW PAVEMENTS,
AS WELL AS,
REHABILITATION
AND
MAINTENANCE
OF EXISTING
PAVEMENTS.

DID YOU KNOW

The HMA industry is America's number one recycler. This is a proud legacy.

SHELL ROCK, IOWA, took the long view on street resurfacing, and with the help of Heartland Asphalt now boasts a fine street system paved with durable, Hot Mix Asphalt.

In 1994 the city began overlaying Seal Coat streets with asphalt, doing approximately seven blocks a year. In 1996 they began placing an asphalt mat with integral Driverover Asphalt Beveled Curbs on each side. Finally in 2003 the citizens approved a bond issue to hire Heartland to resurface the remaining Seal Coat streets with Hot Mix Asphalt, and to make necessary storm and sewer improvements. The \$961,000, 73-block project comprised more than 83,000 square yards of asphalt surfacing, 22,400 lineal feet of asphalt drive-over curb, and 8,000 lineal feet of 30-inch PCC curb and gutter. The well-paved community anticipates getting 20 years out of these streets before they will need another overlay.

"...Heartland did a really good job on this project..."

Larry Young

Mayor
Shell Rock, Iowa

The project engineer was TeKippe Engineering of West Union, Iowa.
