PAVEMENTS.

*Asphalt roads provide  
the smoothest, quietest,  
and most durable riding  
surface you will ever  
travel on.*

**IOWA DEPARTMENT OF TRANSPORTATION** places a lot of emphasis on a smooth driving surface when resurfacing of busy highways is needed. Examples are the two segments of I-35 south of Clear Lake recently completed by Heartland Asphalt. From the plant and lab personnel, to the drivers hauling and dumping the mix and the laydown crew placing the mix, the Heartland team worked together to build a long-lasting pavement that qualified for smoothness incentive pay.

In one of the company's largest volume projects to date, Heartland placed approximately 110,000 tons of Hot Mix Asphalt using a 3/4-inch 30 million E.A.S.L. mix, which was designed by Heartland's Quality Control Personnel in the Q.M.A. Lab, to meet Iowa D.O.T. specifications.

The \$3.5 million project, which included 7.5 miles in Cerro Gordo County and 2 miles in Franklin County, began July of 2003 and was completed in September, 2004.

"...Heartland always demonstrates the ability to get the job done, and this project was no exception..."
