NEW PAVEMENTS,
AS WELL AS,
REHABILITATION
AND
MAINTENANCE
OF EXISTING
PAVEMENTS.

DID YOU KNOW?
Hot Mix Asphalt
technology
has turned into
rocket science in
the past 10 years.

WAL-MART STORES' newest Super Center is due to open between Mason City and Clear Lake this summer. The prime contractor, Westra Construction of Waupun, Wisconsin never had to worry about the access roads, because Heartland Asphalt got the job—and got the job done ahead of time!

This 1.2 million dollar job included more than 11 acres of asphalt with about 25 percent being heavy duty paving, and the balance being regular duty paving. Heartland placed 33,000 tons of base rock in the fall of 2001 to establish a base for construction traffic through the winter months. The remainder of the rock was placed in the spring, with asphalt work immediately following.

The heavy duty paving consisted of a 5-inch asphalt mat placed in two lifts over a 16-inch rock base. The regular duty paving used a 4-inch asphalt mat over 15 inches of rock base.

Heartland placed a total of 12,000 tons of hot mix asphalt in 7 days, using two crews and drawing on the output of their two plants. Asphalt work was completed a full week before the specified completion date.

"...Heartland got things done on schedule, and they did it right..."

Terry Knupp
Project Superintendent
Westra Construction, Inc.
