LAYOUT, EXCAVATION,
BASE PREPARATION,
CONSTRUCTION OF
NEW PAVEMENTS,
AS WELL AS,
REHABILITATION
AND
MAINTENANCE
OF EXISTING
PAVEMENTS.

DID YOU KNOW?
Asphalt is a product that allows traffic to utilize it within hours of being placed.

LIME CREEK NATURE CENTER on the north end of Mason City is a popular year-round attraction for thousands of area residences. Up to recently, the only access was by a rough rock road. Because part of the road is within the city limits and part is in the county, the two entities agreed to combine resources and provide a new, smooth paved surface.

Heartland Asphalt was awarded the \$131,300 contract on October 8 and in order to complete the job before winter, quickly went to work. After the county widened the road and corrected drainage problems, Heartland prepared the existing rock base. Next a 2-inch asphalt intermediate course was laid, followed by a 2-inch asphalt surface course which included an integral asphalt beveled curb to control water runoff on the east-west portion of the road.

Because of the five day turnaround, winter visitors were able to enjoy a smooth, safe ride to the Nature Center, and soon spring and summer visitors will follow suit.

"...Heartland put it all together for us. The job exceeded our expectations."

Jim Witt
Cerro Gordo
County Engineer
