BASE PREPARATION,  
CONSTRUCTION OF  
NEW PAVEMENTS,  
AS WELL AS,  
REHABILITATION  
AND  
MAINTENANCE  
OF EXISTING  
PAVEMENTS.

**DID YOU KNOW?**  
Asphalt can be used in heavy industrial applications.

**AG VANTAGE FS** Chapin elevator is busy with truck traffic most every day of the year. When Heartland Asphalt was hired to pave the access road, scale area, and around the bin site, durability was the first consideration.

When designed properly, asphalt will withstand heavy loads encountered on a day-in, day-out basis, and Heartland has plenty of experience with heavy industrial jobs.

Work consisted of excavating and re-profiling the existing base for proper drainage. Then a 6 to 8-inch asphalt mat was laid in the drive and scale area, with 2 to 4-inches of asphalt

laid around the bin site. Prep time was a week, with just two days needed for paving, leaving the elevator up and running during the entire project.

“...Heartland got in, got the job done without getting in our way...”

**Dan Matheson**  
Grain Manager
